EDUCATION

University of Washington, Seattle

June 2026

B.S. Applied and Computational Mathematical Sciences (Data Science and Statistics)

Minor in Applied Mathematics

TECHNICAL SKILLS

Programming Language & Tools: Python, SQL, R, Java, HTML, CSS

Data Visualization: Power BI, Tableau, Excel (PivotTables, Power Query), Chart.js

Libraries/Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow

Languages: English (Native), Indonesian (Native)

WORK EXPERIENCE

BRICs Lab, UW Industrial & Systems Engineering (SQL, DAX, Python)

Seattle, WA

Data Analytics Research Lead - Starbucks Partnership

May 2025 – April 2026

- Lead an analytical research partnership with Starbucks Engineering team, developing an interactive Power BI dashboard product.
- Developed a scalable data pipeline to process and transform 500K+ for large-scale operational analytics and visualization
- Analyzed time-series equipment and system data across multiple stores to identify inefficiencies and performance trends.

Ongoing Project - Phishing Email Detection and Intent Analysis (Python, Scikit-Learn, Anthropic API)

March 2026 – Present

- Analyze phishing email datasets using large language models to classify variable indicators.
- Design an annotation framework to generate labels and evaluate their impact on machine learning-based phishing detection.

OJK (Indonesian Financial Services Authority) (JIRA, Java, Jupyter)

Jakarta, Indonesia

Summer Internship: Department of Information Systems Management (DPSI)

Jun – Sep 2024

Company Overview: OJK regulates and oversees Indonesia's financial sector.

- Led System Integration Testing for an internal application, ensuring software modules worked seamlessly.
- Validated system outputs and documented technical issues and executed 120+ test cases, tracked defects.
- Coordinated with an 8-member development team and improve application stability prior to launching the prototype.
- Produced technical documentation and performance reports to support system improvements and decision-making

University of Washington – Transfer Program

Seattle, WA

Undergraduate Teaching Assistant

Mar 2025 – Dec 2025

- Co-teach GEN ST 205 supporting over 80+ transfers students transitioning to the University of Washington.
- Provided academic mentorship and detailed written feedback to support student's success.

Projects

Risky-Business - ML-Based Quantitative Equity Forecasting (Python, JavaScript, HTML, CSS)

April 2026

- Built a ML-based equity forecasting pipeline using Random Forest models to predict stock outperformance versus SPY.
- Developed an interactive financial dashboard to visualize strategy performance and model-generated stock rankings.
- Engineered momentum, volatility, and volume factors to back test portfolio performance and risk metrics.

Air Quality Index (AQI) Prediction Using LSTM Networks (Python, Jupyter, Scikit-Learn, TensorFlow)

Mar 2025

- Developed an LSTM-based forecasting model to predict AQI trends using multivariate time-series environmental data.
- Processed and analyzed time-dependent data to identify patterns, variability, and trends.
- Created visualizations using strong data visualization techniques to support clear storytelling and model evaluation.

LEADERSHIP ACTIVITIES

Whatcom Community College ASWCC

Mar – Jun 2023

Vice President for Clubs

- Oversaw operations and engagement for 20+ student clubs, coordinating events and supporting club leaders.
- Managed club registration, renewal, and budget allocation processes while serving as a liaison between students and college administration.
- Served on the S&A Budget Committee (2023–2024), advocating to preserve the Learning Center and reallocating funding to expand tutoring services.
